To: [REDACTED]

I'm aware, [REDACTED] is your password.

I need your complete attention for the the next 24 hours, or I will make sure you that you live out of embarrassment for the rest of your life span.

Hello, you do not know me. However I know nearly anything concerning you. Your entire facebook contact list, smartphone contacts as well as all the online activity on your computer from past 127 days.

Consisting of, your self pleasure video clips, which brings me to the main motive why I 'm crafting this specific e mail to you.

Well the previous time you went to see the adult material webpages, my malware was activated in your computer system which ended up documenting a lovely video clip of your self pleasure act by activating your web camera.

(you got a exceptionally weird taste btw haha)

I have got the complete recording. Just in case you think I am messing around, just reply proof and I will be forwarding the recording randomly to 12 people you know.

It may end up being your friend, co workers, boss, parents (I'm not sure! My system will randomly select the contact details).

Will you be able to look into anyone's eyes again after it? I doubt that...

However, doesn't necessarily have to be that way.

I would like to make you a one time, non negotiable offer.

Buy USD 2000 in bitcoin and send it on the down below address:

bc1***q790ahvuwshl7geg3qy2kqfe9y7aqsan89vqv4

[case SENSITIVE, copy and paste it, and remove *** from it]

(If you don't know how, look online how to acquire bitcoin. Do not waste my valuable time)

If you send out this particular 'donation' (let's call this that?). After that, I will go away for good and never ever make contact with you again. I will delete everything I have concerning you. You may continue living your regular day to day life with absolutely no concerns.

You've 24 hours in order to do so. Your time starts as soon you read through this e mail. I have got an special program code that will inform me once you see this e-mail therefore don't attempt to act smart.
